

N DENVER AVE

PBOT
PORTLAND BUREAU OF TRANSPORTATION

PROJECT BACKGROUND:

In 2016, Portland voters passed Measure 26-173, Portland's first local funding source dedicated to streetscape improvements and projects to promote safety for people walking and biking throughout the city.

N Denver Ave between N Lombard St and N Watts St needs paving maintenance and PBOT is taking the opportunity to improve safety conditions by adding protected bike lanes, safer pedestrian crossings, and a better waiting area for bus riders.

We hope this project will increase access to and through the Kenton neighborhood for people of all ages and abilities.

WHAT WE'VE HEARD:

- **Make the most of city resources** by finding opportunities to improve safety while conducting regular street and road surface maintenance.
- **Increase access to the Kenton business district** for people biking and walking.
- **Improve safety and visibility** of people walking along and crossing N Denver Ave.
- **Provide a safe and comfortable route** for people of all ages and abilities who bike to and through the Kenton neighborhood.
- **Collaborate with community stakeholders** to identify concerns, mitigate construction impacts, and minimize the loss of on street parking while making necessary safety and access improvement.

Parking protected bike lane near Portland State University
